YK Communications Dial-Up Internet Windows 95/98/2000/ME

My YKC User ID is: _____

My Email Address is: _____

My YKC Password is: _____

My IP Address is: Automatically assigned by my server

YKC Email Information

My Incoming server is a POP3 Server.

Incoming mail (POP3) server name: mail.ykc.com

Outgoing mail (SMTP) server name: mail.ykc.com

Using the list below, select a number that can be dialed as a local call from your home.

Area	33.6 Kbps modems	56 Kbps V.90 modems	
Bay City	843-1600	843-1600	<p>Not sure if you have a 33.6K or a 56K modem? Please check with the vendor of your computer or the person that installed your modem for details.</p> <p>Does your computer phone line have call waiting? If so, you need to disable call waiting each time your computer dials the Internet. One way to accomplish this is by adding the Call Waiting disable code to the beginning of the number your computer dials.</p> <p>The call waiting disable code is usually *70.</p> <p>Use a telephone connected to the same phone line your computer is hooked to and dial *70 You should hear a "stutter" in the dial tone. If so, you have the correct disable code. If you hear an error message, please contact your telephone service provider and ask for instruction to Disable Call Waiting Per Call. Add this new disable code given to the beginning of your local Internet number.</p> <p>The local Internet number your computer dials should look like this example: *70,771-1600</p> <p>Note that the star (*) and comma (,) are required!</p>

The telephone number I use to dial into YKC is:

Internet Connection Wizard

Microsoft has created a simple to follow process called a wizard that will ask you questions it needs to know in order to configure your computer to connect to the Internet. To begin the wizard:

Double Click the **“My Computer”** icon

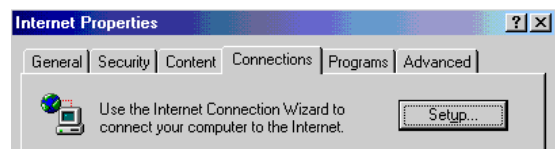

Double Click the **“Control Panel”** icon

Double Click the **“Internet Options”** icon

On the Internet Properties window, click the tab at the top labeled **“Connections”** and then click the button labeled **“Setup...”**

On the “Internet Connection Wizard” window, select **want to set up my Internet connection manually...** and then click **“Next”**.

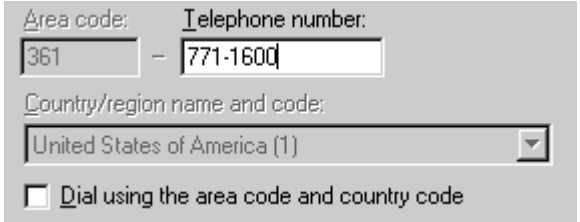

Setting Up your Internet connection

Select **“I connect through a phone line and modem”** and click **“Next”**.

Step 1 of 3: Internet account connection information

Refer back to page one for the telephone number you use to dial into YKC. Enter this number into the telephone number box. Make sure the box labeled “Dial using the area code and country code” is not selected (no check mark). Your window should look similar to the example on the right.

Area code: Telephone number:

Country/region name and code:

Dial using the area code and country code

Click **“Next”**.

Step 2 of 3: Internet account logon information

The next question is a bit tricky. [Refer back to page one](#) for your **User ID** and **Password**. Type your **User ID** in the box labeled “User Name” and type your password in the box provided. You will see stars appear as your password.

User name:
Password:

Click “Next”.

Step 3 of 3: Configuring your computer

Type “YKC” as the name of your connection.

Connection name:

Click “Next”.

Set Up Your Internet Mail Account

You are asked if you want to set up an Internet mail account now. Select “Yes”.

Do you want to set up an Internet mail account now?
 Yes
 No

Click “Next”.

Your Name

Type your real name in the box provided. This is the way other people will see your name on email messages you send to them.

Display name:
For example: John Smith

Click “Next”.

Internet E-mail Address

Refer to [page one](#) for your Internet E-mail address. Type your E-mail address into the box provided.

E-mail address:
For example: someone@microsoft.com

Click “Next”.

E-mail Server Names

Enter the following information as shown to the right:

My incoming mail server is a **POP3** server.
Incoming mail server: **mail.ykc.com**
Outgoing mail server: **mail.ykc.com**

My incoming mail server is a server.
Incoming mail (POP3, IMAP or HTTP) server:

An SMTP server is the server that is used for your outgoing e-mail.
Outgoing mail (SMTP) server:

Click “Next”.

Internet Mail Logon

Enter your complete **E-mail address** in the box labeled "**Account name:**".

Enter your password in the box provided.

Select the box labeled "**Remember password**".

Make sure the box labeled "**Log on using Secure Password Authentication**" is not selected.

Click "**Next**".

Type the account name and password your Internet service provider has given you.

Account name:

Password:

Remember password

If your Internet service provider requires you to use Secure Password Authentication (SPA) to access your mail account, select the 'Log On Using Secure Password Authentication (SPA)' check box.

Log on using Secure Password Authentication (SPA)

Completing the Internet Connection Wizard

On this window, you are given the option of making a Connection to the Internet immediately after finishing the wizard. We recommend clicking the box to remove the check mark and then clicking "**Finish**".

When you are ready to connect to the Internet

Double click on the Internet Explorer icon. Click on the "Help" menu for answers to common questions about using Microsoft Internet Explorer.

When you are ready to begin using Email

Double click on the Outlook Express icon. Click on the "Help" menu for answers to common questions about using Microsoft Outlook Express.

Manually Connecting to YKC On-Line

If clicking the Internet Explorer icon does not automatically bring up your Dial-Up Networking connection, you may need to manually connect to the Internet.

- Double click on "**My Computer**"
- Double click on "**Dial-Up Networking**"
- Double click on the "**YKC**" icon
- Verify your User ID and Password
- Click "**Connect**"

Your computer will dial and after a short exchange connect to the Internet. You should receive a confirmation message indicating that you have been connected to the Internet. You can now start Internet Explorer, Microsoft Outlook Express or any other program that requires Internet access. Please visit our support page located at <http://www.ykc.com/support> to learn how to restore your automatic dialing.

When you are ready to disconnect from the Internet

Notice the small icon on the bottom right corner of your screen (close to the clock) that looks like two connected computers. Anytime this icon is visible on the Task Bar, you are connected to the Internet.

Normally, your Internet connection should auto-disconnect when you close the programs that are using the Internet. If your connection does not disconnect, double click the icon of the two small computers on the Task Bar. Double clicking this icon will give you details about your current connection as well as an option to disconnect from the Internet.

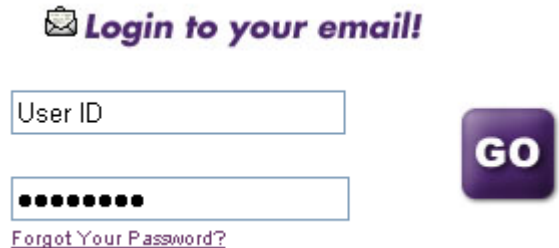

How to check email using Webmail provided by YK Communications

1. Launch **Internet Explorer**

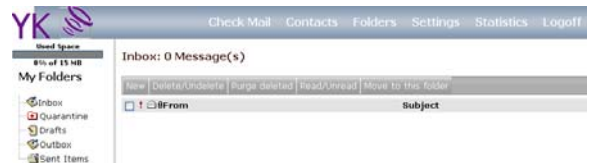

2. Visit the following address. www.ykc.com

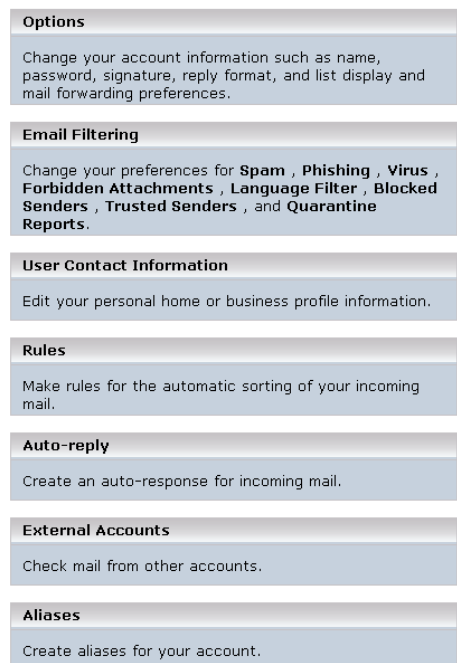

3. Once at the YKC website scroll to about the middle of the page. On the left hand side you will see a display as shown to the right. Enter your full email address and password, then click the "GO"

4. After clicking the "GO" button a new page will open. This new page will display your email inbox.

5. YK Communications offers many advanced options with your Webmail access. All these options, from Email filtering, Auto-replies and sorting rules can be located under the **Settings** option in webmail. Once you have selected the Settings menu a similar screen below will appear.

Getting additional help

Please visit our support page for tips and help with using the Internet with YKC. Our web page address is <http://www.ykc.com> Select "support" for help.

Questions about using Microsoft Internet programs can commonly be answered by using the Microsoft Knowledge Base. The Knowledge Base can be accessed from the Microsoft Web site at <http://www.microsoft.com> Click on "Support" and then select "Knowledge Base".

If you are not able to locate help from the above web sites, please call one of our business offices listed below:

YK Communications, Inc.
109 West Putnam
Ganado, Texas 77962
800-395-1499

YK Communications, Inc.
1905 West Loop
El Campo, Texas 77437
800-395-1499

Thanks for selecting YK Communications as your Internet service provider!
