

Establishing a Wireless Connection

First and foremost thank you for choosing YKC as your Internet Service Provider. It is a privilege to provide reliable quality service to our neighbors. This documentation will assist you establishing a wireless connection to your new Wireless Network.

YOUR YK COMMUNICATIONS ACCOUNT INFORMATION:

My IP Address: _____

My Wireless Network (SSID): _____

My WEP Key: _____

My YK Email Address: _____ @ykc.com

My YK Email Password: _____

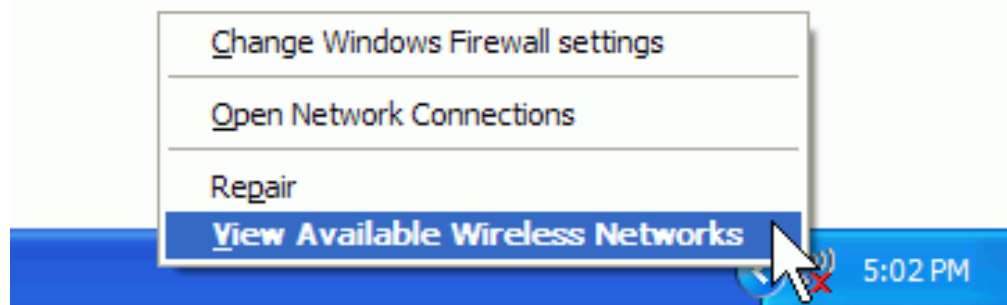

YKC Email Information:

Incoming Mail (POP3): **mail.ykc.com**

Outgoing Mail (SMTP): **mail.ykc.com**

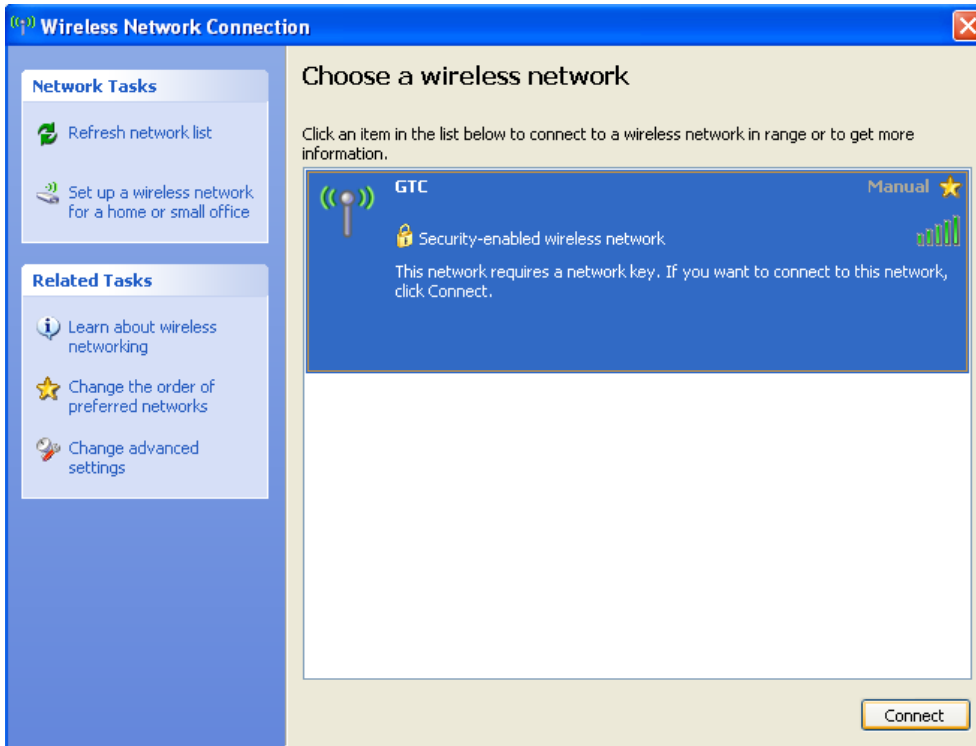

To Connect your computer to your Wireless Network:

1. Right-click the wireless network icon in the lower right corner of your screen, and then click **View Available Wireless Networks**.

Note: If you run into problems using an external wireless adapter, consult the documentation that came with your network adapter. Also don't hesitate to call the manufacturer's technical support number for help.

2. The **Wireless Network Connection** window appears and displays your wireless network listed with the SSID you chose. If you don't see your network, click **Refresh network list** in the upper left corner. Click your network, and then click **Connect** in the lower right corner.

3. Windows will prompt you to enter a key. Type the WEP key (that is recorded on the first page of this document and labeled on the bottom of your equipment) in both the **Network key** and **Confirm network key** boxes, and then click **Connect**.

4. Congratulations you are now ready to browse the Web wirelessly.

Should you experience any issues or need assistance please contact our Tech Support Department by emailing support@ykc.com or calling 800-395-1499 Ext 610
